

ICS261: SSAD & Project

Team number	25
Project Title	<i>Elektoo</i>
Document	SSAD Project Concept Document
Creation date	<i>24 August 2015</i>
Created By	<i>Prachi Agrawal , Ayushi Goyal , Vinay Singh , Aman Rai</i>
Client	<i>Ankit Aggarwal</i> , CEO Fluence Technologies GRYCS Kavuri Hills, Hyderabad

Description

The Elektoo project deals with the creation of choice based search engine ,probably the first of its kind . The present day customer is highly confused over his needs and requirements. So this engine will also deal with resolving the ambiguity of the queries such as “Best Samsung phone ” and narrow down the no. of results for the users . This will be a self-learning system which will improve its database with time.

Profile of Users

The End-users will be customers who like shopping and purchasing other items through online retail store. The end-users can belong to any section of the society therefore GUI used in the navigation of the search engine will be simple and user-friendly.

Usage Model and Diagrams (if any)

Choice Matrix(eg. mobile)

Features/Brand	Samsung	Apple	Nokia	Sony
Screen Size				
Price				
Camera				
Memory				

Options updated in real time

Choice Query

	No of results found (updated in real time)	SEARCH BUTTON
